<b>1. Boris Popescu Gratian Lupu</b>	FUNDAMENTE DE ANALIZA GEOPOLITICA DIN PERSPECTIVA IMPLICARII ROMÂNIEI FUNDAMENTS OF GEOPOLITICAL ANALYSIS REGARDING THE ROMANIAN IMPLICATION
<b>Abstract</b>	Among the changes which took place in the last years in Romania there is the elaboration of The National Security Strategy. Unfortunately this document is not an official one, yet. About 1/3 of the Romanians living Western and Northern to the Black Sea, on the lower Danube and in the Carpathian mountains live outside of the Romanian borders, in the neighboring countries. Because of the late political and international developments Romania has become a more important geopolitical power at the Black Sea, being involved in different international affairs.

<b>2. Alexandru Fodor</b>	MISTICISM, OCULTISM SI NAZISM ÎN TIMPUL CELUI DE-AL DOILEA RAZBOI MONDIAL MYSTICISM, OCCULTISM AND NAZISM DURING WORLD WAR II
<b>Abstract</b>	This work is about a very difficult period of time, when many people died in the name of their country, but some nations were very fanatic and committed horrible crimes because of their beliefs. The German leaders are considered to be the main cause of the Holocaust, phenomenon very hard to explain. It is interesting the fact that Adolf Hitler and a lot of people from the upper class believed in mystical powers and gave occult explanations to cruel happenings. My paperwork mentions the myth which talks about the blond child with blue eyes, about Aryanism or the supremacy of the German nation. An important role was held by Erik Hanussen, who guided Hitler to manipulate the simple people and also became his adviser. After Hanussen died, Karl Krafft became Hitler’s new adviser. This one was an astrologer, and on the other hand, he worked with the British Secret Service. Adolf Hitler believed all these stories and when Krafft was murdered he started to read Wohl’s horoscopes. It’s not understandable that some leaders can decide the faith of many lives by listening to occult stories. In this writing we can also find information about Rudolf Hess, a strange person who studied witchcraft, cabala and other things. He was very close to Hitler and also to Karl Haushofer. The last one is the main German geopolitical, but also one of the most active occult teachers. We can also find out how Germans understood death in war, how important it was to fight for their culture, how the soldier was seen by the people and why it was necessary to kill so many innocent people.

<b>3. Ioana Despina</b>	PETROLUL – RESURSA STRATEGICA
-------------------------	-------------------------------

<b>Matau</b>	OIL – A STRATEGIC RESOURCE
<b>Abstract</b>	My article describes the important role played by the oil in the political and economic life. In the introduction I describe the oil as a very important component of the social life which can not be found in certain states (for example the rich states or the developed ones). Then I speak about the oil geopolitics and the Russian dependence. Russia is the state who has the most oil resource at the moment and all the other countries depend on it. Because the characteristics of the international oil market are very important I reminded and explained it. In the last part of my article there is a study about the Romanian oil situation.

<b>4. Alexandra Frighenciu</b>	DECLINUL PETROLULUI SI SOARTA CIVILIZATIEI UMANE THE DECLINE OF OIL RESERVES AND THE FAITH OF HUMAN SOCIETY
<b>Abstract</b>	This article speaks about the importance of oil in human's life, how it influences our lives, and on the other hand what will happen with the civilization in the post-petrol period. The Middle East is the most important actor on the oil trade scene and because of the last political actions in the area its offer suffered some changes. The global financial system is dependent on a constant increase of the consumption of the oil and natural gases. This is the truth, the end of the oil is coming and states start to create defense strategies.

<b>7. Eugen Strautiu Dana Alexandru</b>	ANUL ELECTORAL 2004 ÎN EUROPA. EVOLUTII SI TENDINTE THE ELECTION YEAR 2004 IN EUROPE. EVOLUTIONS AND RUNS
<b>Abstract</b>	<p>In the Romanian reference material there is no systematic and elaborated preoccupation regarding the electoral process in the world or at least on the continent. The benefits of such preoccupations are obvious both for the learning of the general mechanisms and the peculiarities of the functioning of the democratic process in its various ways of perception, and for the correct relation of the rules and of the Romanian electoral evolutions to the universal realities.</p> <p>Obviously, the scientific value of the effort of the systematic analysis of the national electoral moments is growing exponentially with the duration of the analyzed period. Therefore, the opportunities of comparative analysis, of synthesis, of intervention using all means of mathematics (of statistics especially) increase in the modelling of some evolutions. Under these circumstances, the present study is meant to represent an introductory scientific approach, bearing the value of a means of work and study.</p> <p>The end of an electoral cycle can be an optimum moment for the recollection of the electoral course at its beginning. Thus, we would obtain the reference element for the comparative analysis of the level of the internal political forces, at the beginning and at the end of the parliamentary and/ or presidential mandate. For Romania, the benefit of taking as reference the electoral year 2004, considering the end of the parliamentary mandate in November 2008, is unquestionable.</p>

<b>8. Mojtaba Zarvani</b>	JUSTIFICATION OF POLITICAL AUTHORITY IN THEOLOGICAL (ISLAMIC) EPISTEMOLOGY
<b>Abstract</b>	<p>The political views of the speculative theologians have been more abstraction and justification of the events of the age rather than an issue resulting from their scholastic theological geometry. “ In other words, in the field of politics, the speculative theology [not only today, but also always] has been a sort of filling the gap and resurfacing the work”. In order to prove this argument, we will show a process during which from the early days of Islam up to Ghazzali, gradually the monitoring elements which challenge the authority of the Islamic ruler became fade. Moreover, the speculative theologians in their political views gradually reach to a point in which they consider a ruler with no specific features qualified to serve as a judge.</p> <p>That is to say, the authoritative nature of the Abbasid government, which</p>

	according to many thinkers is the heritage of imitation from the Iranian and Sasanid traditions made a situation that even the Ash'arites thinker who used to consider the return to the age of The rightly Guided Caliphs as a Utopia, mutilated and made a selection out of the traditions of the holy prophet and the caliphs.
